

## OUR CUSTOMERS

Space industry is the historical and main target for Dinamica Srl. The expertise gained over many years of research and cooperation with industrial partners laid the groundwork for our activity in this sector, involving:

- 👁️ space engineering companies;
- 👁️ national and international space-related agencies and institutions;
- 👁️ national and international universities.

Transferring technologies and methodologies is among the main assets for Dinamica Srl. Beside the established expertise within the space field, our people have then achieved valuable capabilities in additional domains, including:

- 👁️ homeland security;
- 👁️ energy;
- 👁️ automation.

## DINAMICA

Dinamica Srl is an Italian engineering firm. We are devoted to developing cutting edge solutions and products for our clients based on their most challenging needs, striving for effectiveness and excellence.

### OUR HISTORY

The origin of Dinamica Srl dates back to 2008, following the efforts of a team of five experienced researchers in the field of space engineering to bring their expertise to Industry. Right after its birth, the Firm started supplying its best service and value to companies, government, and institutions.

### OUR MISSION

*Dinamica Srl will carry on developing methods and advanced solutions within the space field, and will promote their use into other industrial sectors, therefore filling the gap between the academic and the industrial sphere.*

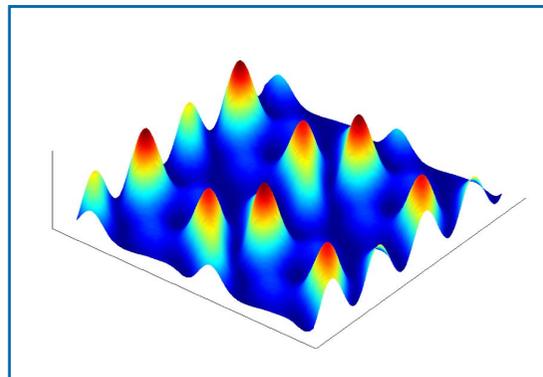

## WHY CHOOSE DINAMICA

**Professionalism.** Our people are trained to professionalism, meaning that competence will always be supported by integrity and commitment to our clients.

**Flexibility.** The experience gained in the space sector, featuring ever-changing challenges, provides Dinamica Srl with the necessary skills to work in dynamic environment.

**Innovation.** The investment in research allows us to keep proposing cutting edge solutions and methodologies, with a sound overview of the applicative context.

**Multidisciplinary.** Since its foundation, Dinamica Srl has been involved in multidisciplinary projects, asking for competences in various engineering sectors.

## CORE SKILLS

Dinamica Srl offers highly customizable solutions guaranteed by its experience in the aerospace engineering sector, including:

- 👁️ space system and trajectory analysis and design;
- 👁️ system simulation tools;
- 👁️ concurrent engineering;
- 👁️ activity planning and scheduling;
- 👁️ autonomous failure identification and management;
- 👁️ optimal management of resources;
- 👁️ artificial vision systems;
- 👁️ error and uncertainty analysis and control;
- 👁️ local and global optimization techniques;
- 👁️ optimal control of dynamical systems and processes.
